PROJECT EXPERIENCE

TEKK, UX/UI Designer, Vancouver, BC, April 2023

Connects clients and employees seeking employment.
- Created user flow, wireframes, UI kit, and mock-ups which helped to build an application that flows smoothly, is easy to use and is consistent in design.
- Improved the end-to-end experience of our application by performing usability tests, detecting UX issues, and proposing design recommendations.
- Developed the branding using color schemes, and imagery that enabled the project's aesthetic elements, functionality, and primary goal to stand out.

GuestMe, UX/UI Designer, Vancouver, BC, August 2022

Connects speakers with Canadian educational institutions to make the booking procedure easy.
- Restructured the user flow, designed the wireframes, and analyzed data for the project proposal to ensure the project operates efficiently.
- Designed the products' creative social assets and other graphic resources.
- Communicated with team members and provided a better understanding of the GuestMe project's user experience architecture by refining the user flows, which developed a user-friendly website.

Home Genie, UX Designer, Vancouver, BC, April 2022

A digital bidding platform that offers low-cost professional services.
- Employed analytical techniques such as interviews, surveys, personas, and front-end coding and it increased the speed and efficiency of work.
- Identified and resolved issues by conducting tests prior to releasing the project and accomplished the project within the timeline.
- Contributed to designing user flow and wireframes, as well as data analysis for the project proposal, to ensure that the project runs smoothly.
